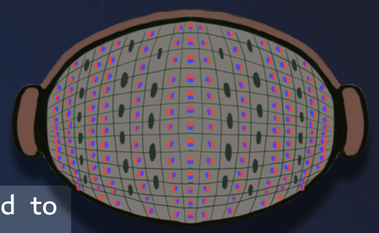
Product Design

Kérastase uesd

Laser hair growth machine

LLLT(Low Level Laser Therapy) technology is used to prevent hair loss, featuring 650-900 nm red and blue light. Besides, we Insert lined conditioner nozzles in laser arrays.



The shell is made of recycled plastic, which is recyclable.

Recycled shell

Eye Massage & Stripe Remover

Male skin is, on average, approximately 20% thicker than female skin. That's why we use more powerful ball massagers for the men's eye area and forehead. Heat conduits are arranged around the ball massager to further enhance the wrinkle removal effect. Lotion spouts are also inserted.

Eyecup Inner Fabric

LYCPRA chemical fiber fabric, with great elasticity and extensibility, breathable, soft and comfortable

Knobs

Rotates 90 degrees back and forth to maximize scalp coverage.
